

SOCIOLOGY – 2015

Sociology is about understanding and interpreting society and the people within it. Sociologists are concerned with the ways we organise our lives and institutions and the consequences of such activity. Central to the work of sociology are themes related to culture, identity, power and inequality and an investigation of how these are changing in contemporary life. The social world is explored with the help of theories about the nature of social life and a range of qualitative and quantitative data collection methods.

Sociology can be studied as

- single and extended majors in the Bachelor of Arts or a major in the Diploma in Arts
- electives as part of the Bachelor of Social Science, or another degree program offered by UQ

Bachelor of Social Science

This program offers students a sound academic basis for careers relating to people, or postgraduate study.

The following majors are available in the Bachelor of Social Science

- Criminal Justice
- Development
- Health and Society
- Social and Public Policy

Honours

Honours can be undertaken as a fourth year of study following completion of the Bachelor of Arts or Bachelor of Social Science. Honours provides students with skills that are highly sought after by employers, particularly in advanced training in research design and methods, experience in conducting independent research and advanced communication skills. Students who do very well during their honours year may be eligible to go onto a research higher degree (Master or PhD).
