

ARCHAEOLOGY - 2017

Archaeology is the scientific study of the prehistoric and historic human past. Archaeologists examine past cultures through the study of artefacts, human remains and other sources. Students learn from working on a range of archaeological sites in Australasia, the Pacific Islands, Central America and the Near East. They also gain skills in our Archaeology Laboratory, the ATARC (Archaeology Teaching and Research Centre) and the Anthropology Museum that enable them to assess the importance of the human past in understanding our culturally diverse modern world.

Archaeology is available as

- single and extended majors in the Bachelor of Arts or a major in the Diploma in Arts
- single and extended majors in the Bachelor of Science (Archaeological Science)
- electives as part of the Bachelor of Social Science, or another degree program offered by UQ
